xtra tutorial: Downloading Oracle Data Visualization Desktop

READY

This tutorial was built for BDCS-CE version 17.3.5-20 as part of the New Data Lake User Journey: here (<https://github.com/oracle/learning-library/tree/master/workshops/journey2-new-data-lake>). Questions and feedback about the tutorial: david.bayard@oracle.com (<mailto:david.bayard@oracle.com>)

About Oracle Data Visualization Desktop

READY

Oracle Data Visualization Desktop (here (<https://docs.oracle.com/middleware/bidv1221/desktop/index.html>)) is a lightweight, single-file download tool to easily analyze data. Data Visualization Desktop can connect to a variety of data sources. In this tutorial, we will show you how to install DV Desktop.

Download Oracle Data Visualization Desktop

FINISHED

Download DV Desktop from here (<http://www.oracle.com/technetwork/middleware/oracle-data-visualization/index.html>)

This tutorial is based on DVD version 12.2.4.0.0 - October 2017 Update. You should use at least this version.

Oracle Data Visualization Desktop Downloads

Download the latest version of Oracle Data Visualization Desktop

Oracle Data Visualization Desktop 12c

 [Oracle Data Visualization 12c 12.2.3.0.0 Windows Installer](#)

June 2017 Update (410,965,117 bytes)

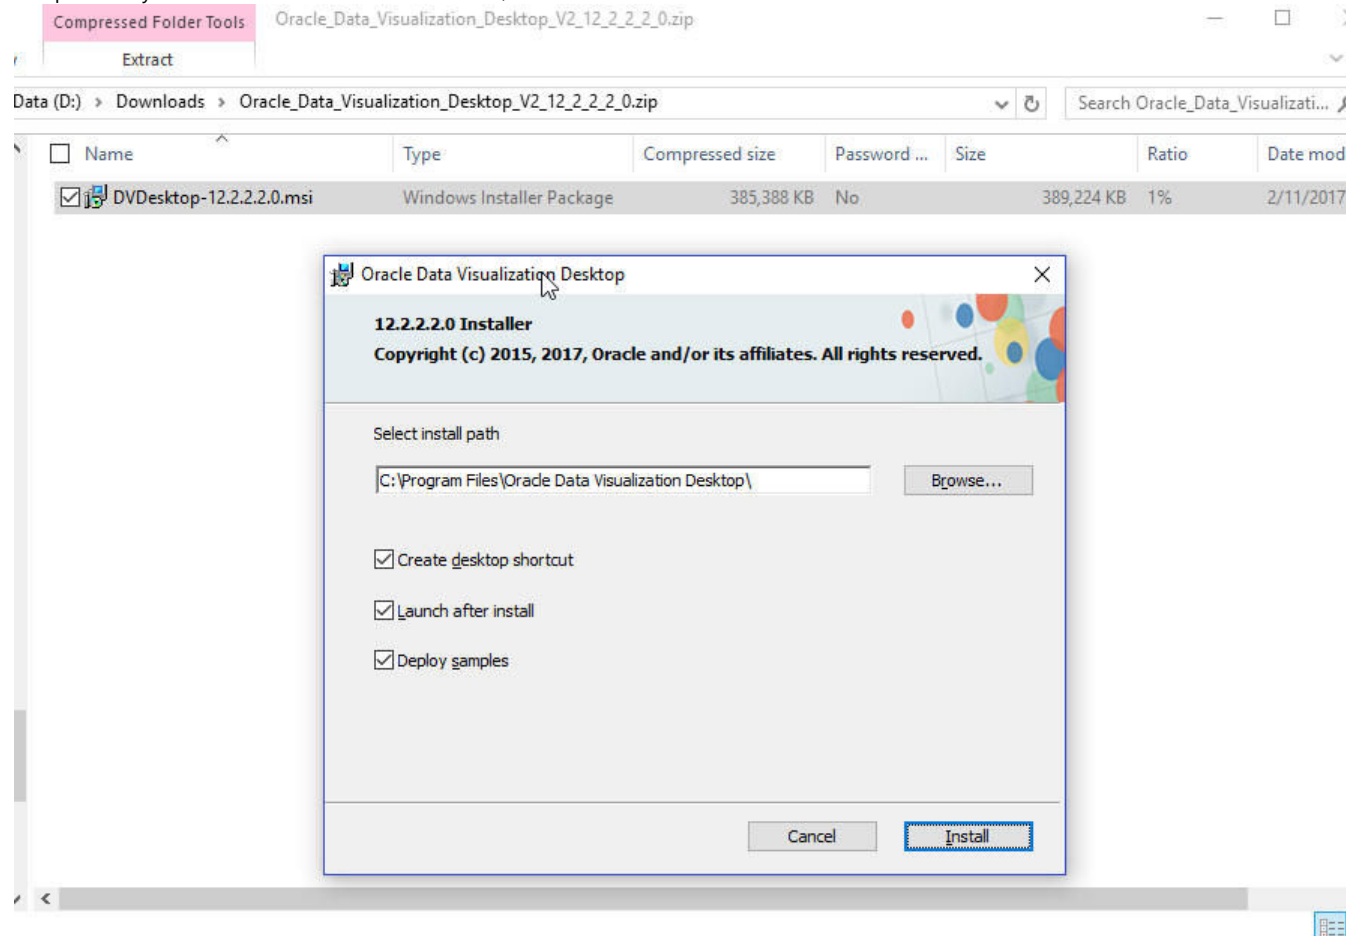

NOTE : Upgrading your Oracle Data Visualization Desktop to version 12.2.3.0.0 will mean that new project exports will be incompatible with earlier versions of Oracle Data Visualization both on premises and in the cloud. Therefore you are advised not to upgrade your Data Visualization Desktop until those deployments have also been updated.

Extract the DV Desktop zip file and run the DVDesktop.msi

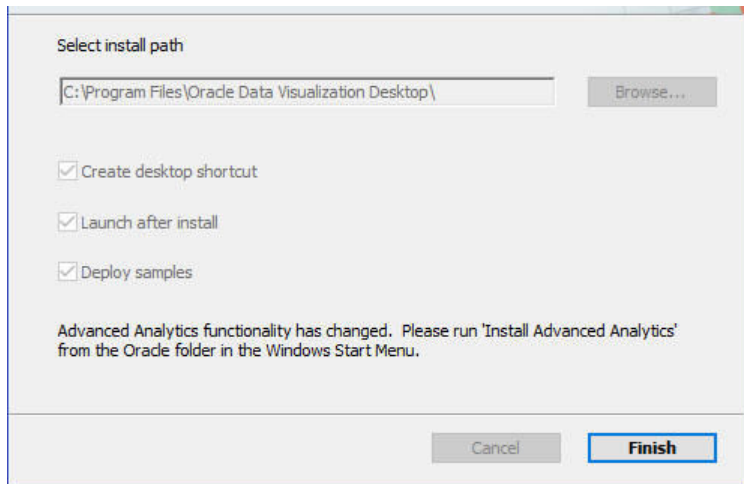

READY

- Unzip the file you downloaded to extract the .msi file, and then launch the .msi file.

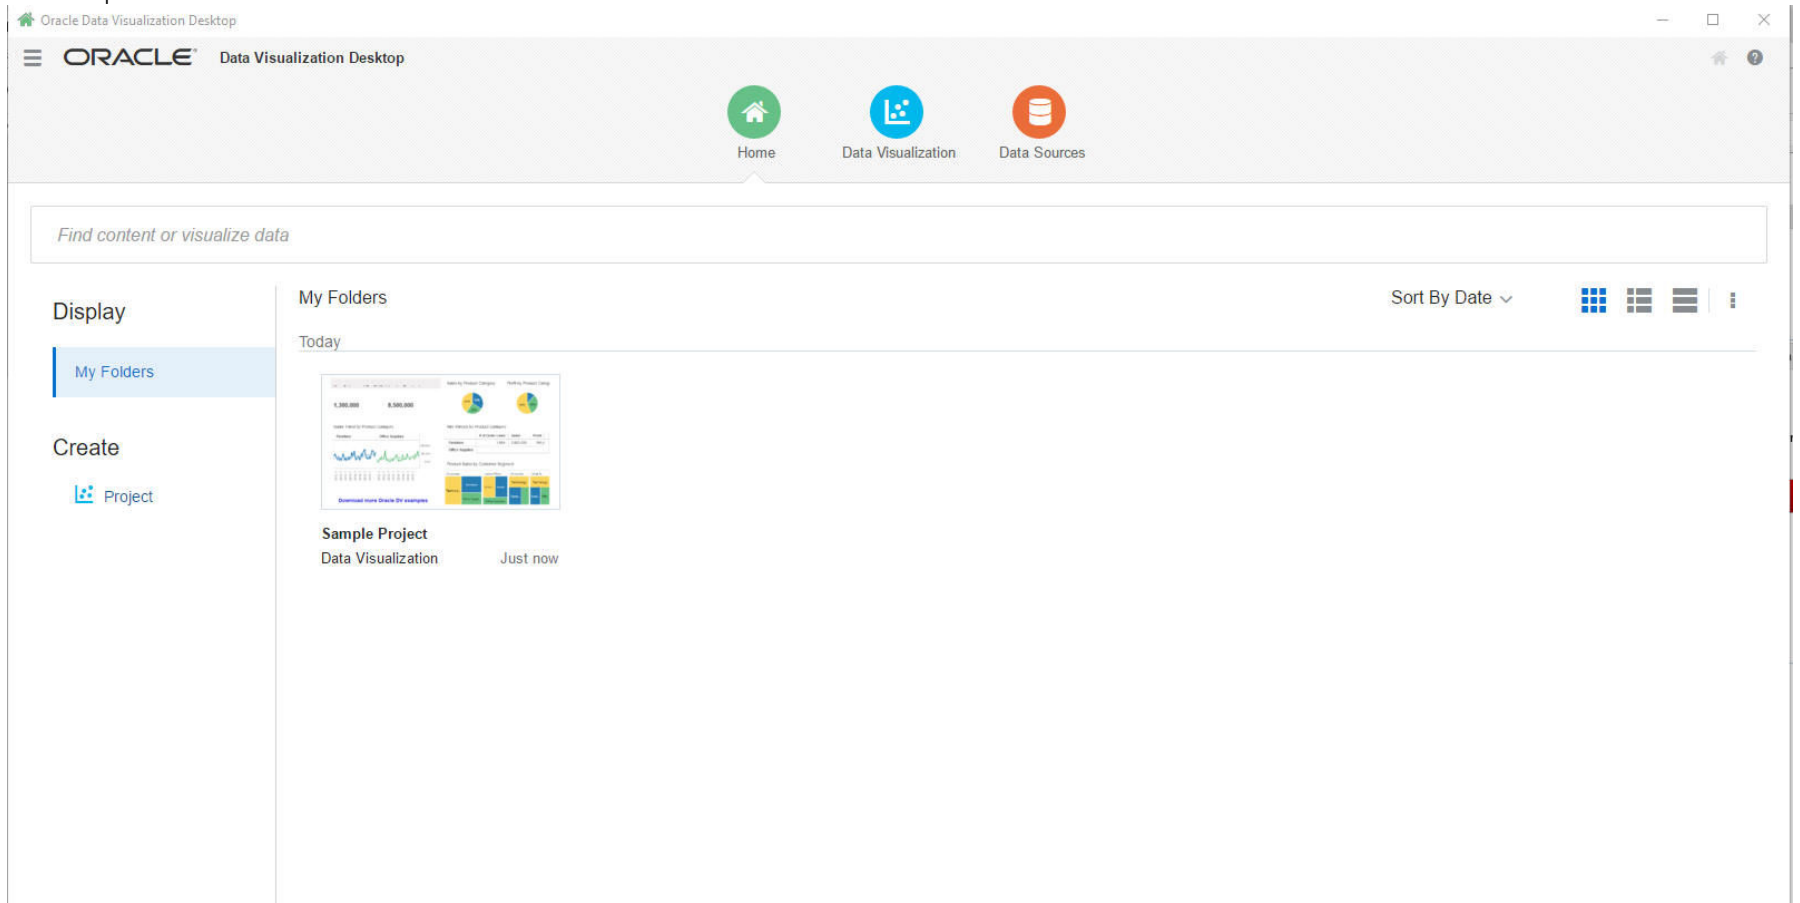

- Follow the prompts to install DV Desktop
- When the install is done, click Finish

- DV Desktop will launch

Next Steps

READY

Now that Data Visualization Desktop is installed, you can follow the tutorial "Tutorial 4c Getting Started with DVD" for instructions on how to start visualizing our bike trips data.

Tip - Viewing the DVD log files

READY

- Navigate to where you installed DVD (example: c:\Program Files\Data Visualization Desktop)
- Open up a CMD window as Administrator in that folder
- In the CMD window, type:
 diagnostic_dump.cmd outputfile.zip
- Look in the outputfile.zip for the logs

Or look at C:\Users\USERNAME\AppData\Local\Temp\DVDDesktop\logs\OBIS\obis1-query.log
