Lab Preparation and Logistics

Lab - Cloud Platform Overview

Cloud Platform Solutions and Capabilities

Defensible Differentiation

Lab Preparation and Logistics

Were going to review the set-up requirements and how to gain access to the Oracle Cloud.

Where to locate and get Oracle Cloud help: services, documentation, etc.

So you can successfully login and use the Oracle Cloud this week for the upcoming sessions.

Oracle Cloud Prerequisites

To perform labs for this session and the rest of the week:

- Primary requirement: supported web browser and working internet connection

Web / Mobile Browser	My Services	Oracle Cloud Console
Microsoft Internet Explorer	11 or later	<ul style="list-style-type: none">• Latest desktop version• Private browsing not supported
Mozilla Firefox	52 or later	<ul style="list-style-type: none">• Latest desktop version• Private browsing not supported
Google Chrome	63 or later	Latest desktop version
Apple Safari	10 or later	Latest desktop version
Microsoft Edge	35 or later	<ul style="list-style-type: none">• Latest desktop version• Private browsing not supported
Safari, Chrome, Firefox on iOS (iPad and iPhone)	Latest	Not supported
Chrome, Firefox on Android (Phone and Tablet)	Latest	Not supported

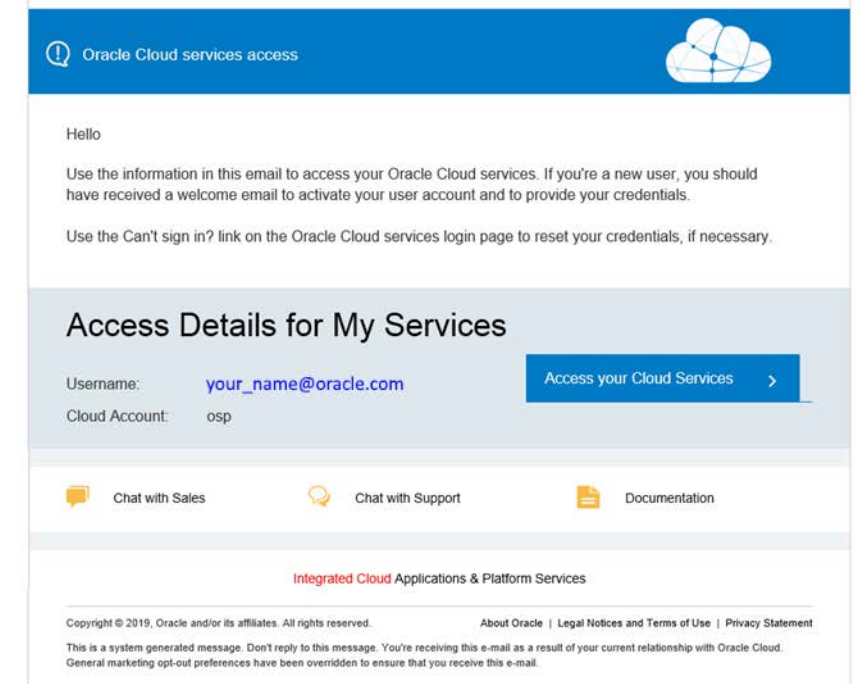

- Chrome 63 or later is recommended for lab work this week
- Install Chrome now should you not already have it
- <https://www.google.com/chrome/>

Email for Login & Link to Cloud My Services

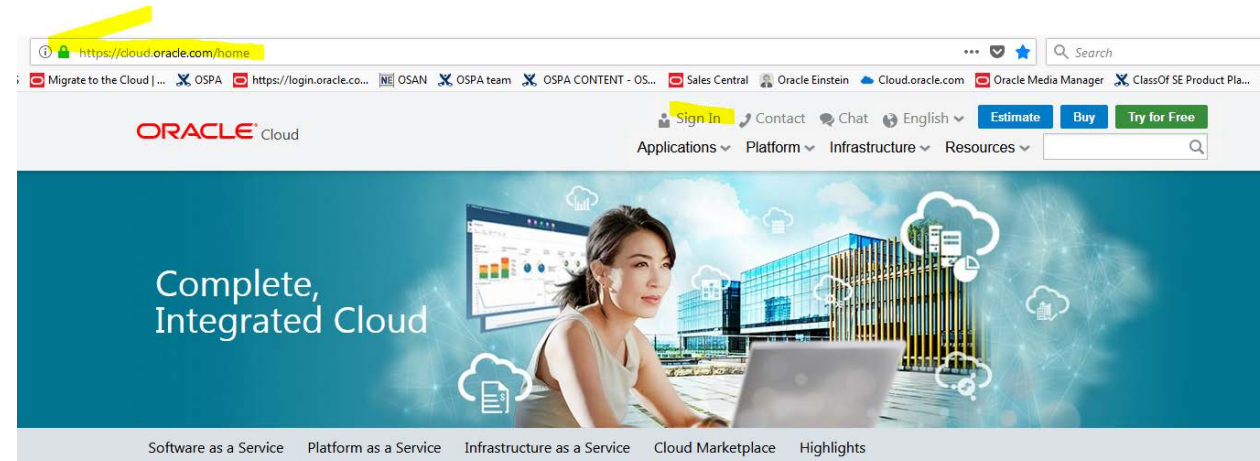

- A. After you sign up for the free Oracle Cloud promotion or sign up for a paid account, or as with this lab, you'll get a welcome email. The email provides you with your cloud account details and sign in credentials
- B. Scroll down to the Access Details section and note user name and password
- C. Note your the name of your Cloud Account, Access Details, and Identity Domain
- D. Click Access your Cloud Services to get started
- E. Bookmark it before you sign-in

Note: also a right mouse click on Access your Cloud Services box enables you to capture the URL so you can save a copy or bookmark it. Make sure to keep a copy of that email for later reference.

Accelerating Business Transformation

Oracle Autonomous Database

Oracle [Autonomous Transaction Processing](#) and [Autonomous Data Warehouse](#) deliver self-driving, self-securing, self-repairing database services that scale instantly to meet the demands of mission critical applications.

Improved Pricing Options

Simplify cloud purchasing and utilization with two new IaaS and PaaS pricing options: [Universal Credits](#) and [Bring Your Own License](#). Sign up for a cost-effective, monthly flex subscription and benefit from discounted, predictable cloud spending. Or, apply existing Oracle on-premises licenses to lower your

Why Move to Oracle Cloud

Enterprises can innovate faster, improve customer engagement, drive business-process efficiency, and accelerate digital transformation with Oracle Cloud. Oracle is the enterprise technology partner that positions companies of all sizes to succeed on their journey of digital transformation.

Summary of Learning

Oracle Cloud Platform

- You understand and have verified you meet the prerequisites to using the Oracle Cloud
- You know the initial email is important as it has the Oracle Cloud access link and initial sign-in credentials. And check the SPAM folder when it does not appear when expected
- You can successfully login and actively participate in the HOL work in the rest of the training session this week
