ORACLE®

Safe Harbor Statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described for Oracle's products remains at the sole discretion of Oracle.

Autonomous Data Warehouse

ORACLE®
Cloud Infrastructure

Easy

- Fully-managed, pre-configured and optimized for DW workloads
- No need to define indexes, create partitions, etc.
- Simply load data and run

Fast

- Based on Exadata technology

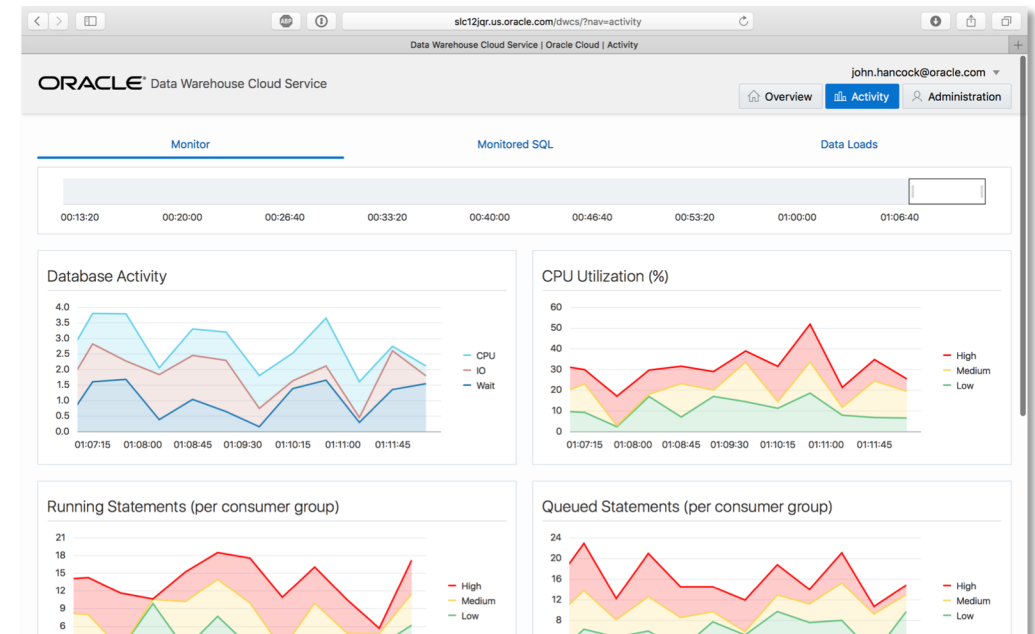

Elastic

- Instant scaling of compute or storage with no downtime

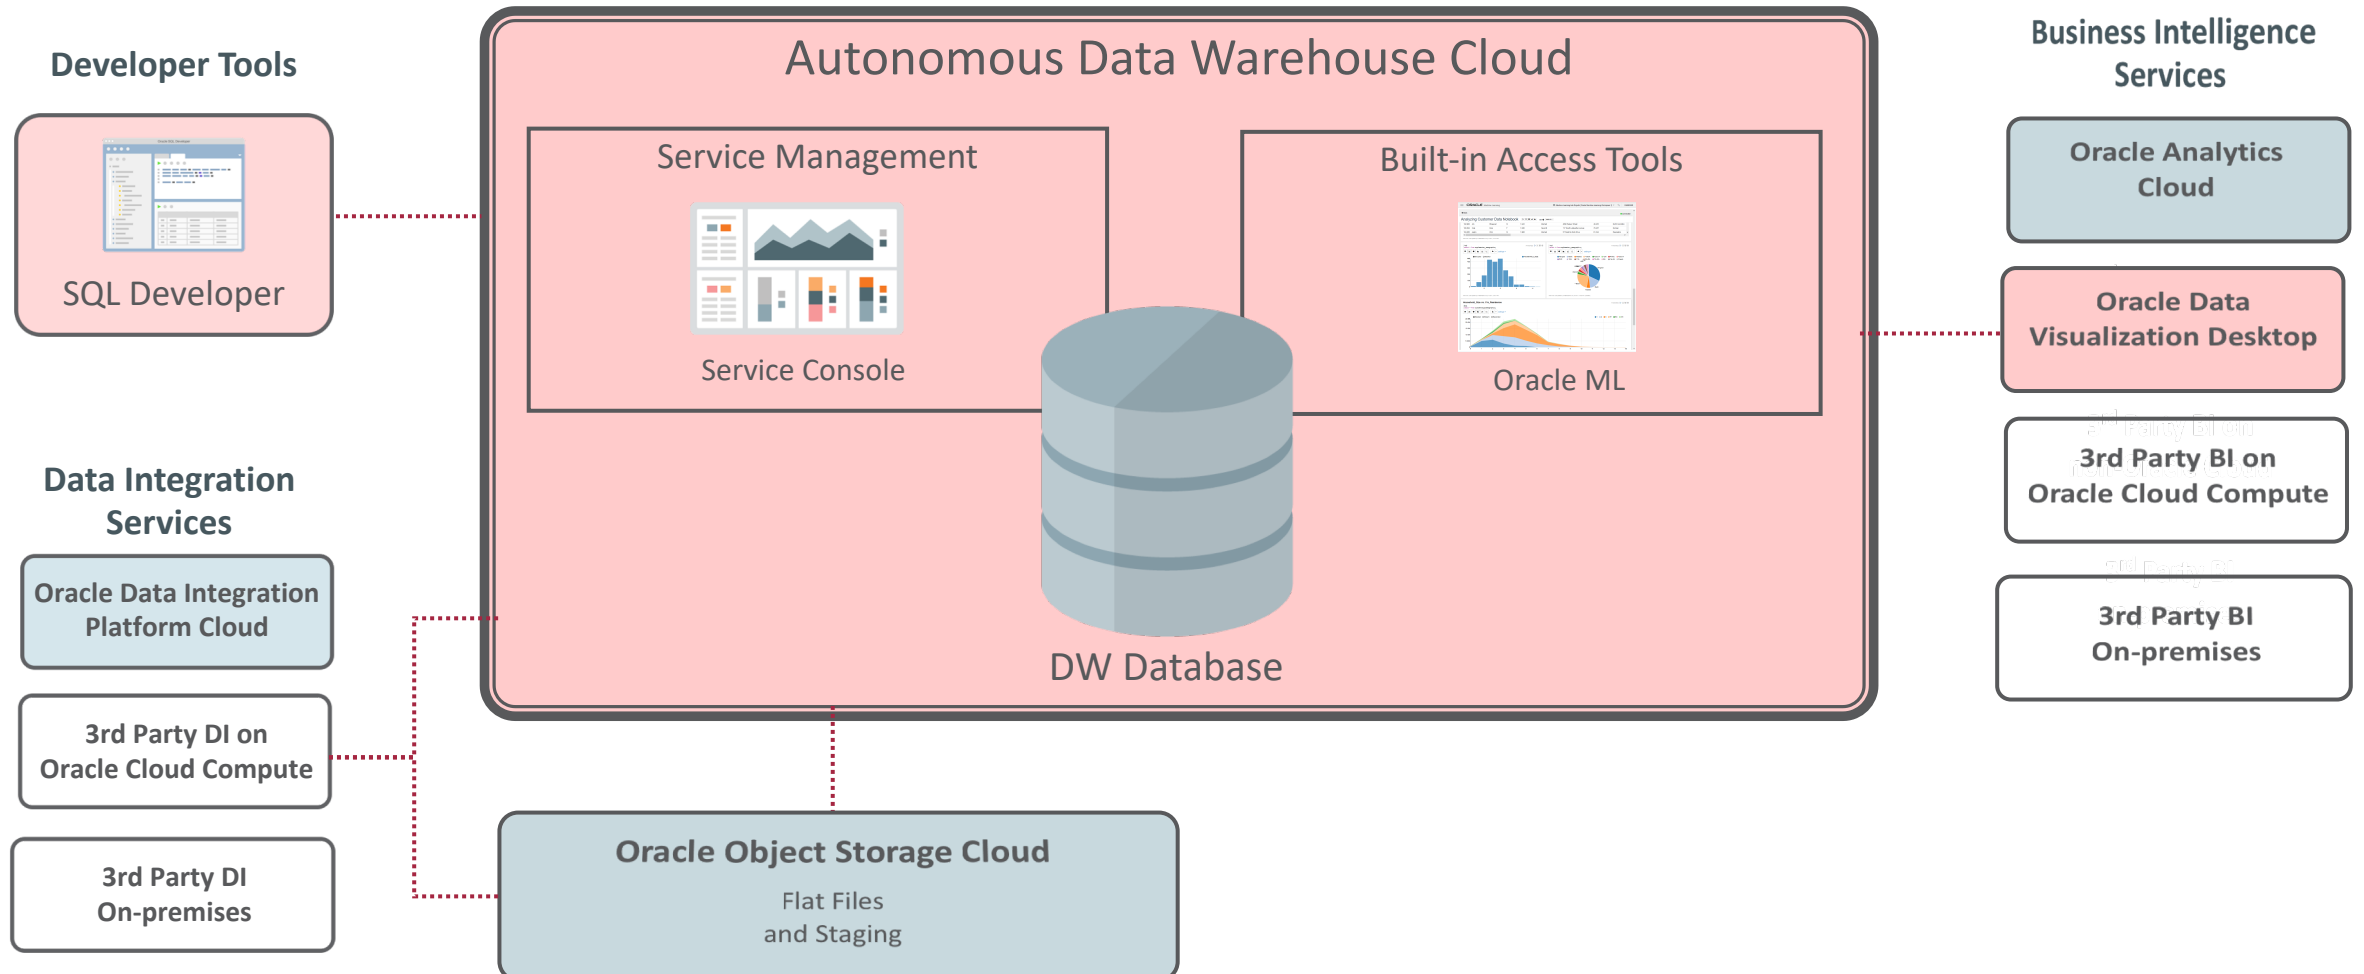

Automated Tuning

- “Load and go”
 - Define tables, load data, run queries
 - No tuning required
 - No special database expertise required
 - No need to worry about tablespaces, partitioning, compression, in-memory, indexes, parallel execution
 - Fast performance out of the box with zero tuning
 - Simple web-based monitoring console
 - Built-in resource-management plans
